What

IB programmes emphasize “learning how to learn”. The programmes help students interact effectively with their learning environments and encourage them to value learning as an integral part of their everyday lives.

ATL skills help students effectively manage and evaluate their own learning—in other words, to become self-regulated learners.

Who

ATL skills are important for all members of the school community to understand: **teachers, subject-group leaders, curriculum specialists, student support teams** for inclusive education and special educational needs, **counsellors** and **pastoral care/guidance leaders**, and **administrators**.

When

Early on: ATL skills can be an easy place to begin introducing MYP terminology and unit-planning practice. Skills development is important whenever teaching and learning are under consideration.

As implementation deepens, ATL skills can play a central role in curriculum coordination (vertical and horizontal articulation). There are specific requirements for ATL development at authorization and programme evaluation.
